This article is about Sony Vaio VGN-CS320J Touchscreen Intel Processor. Sony Vaio VGN-CS320J Touch Sensor with AV Control. A touch sensor with AV controls can be installed on Sony's latest Ultrabook and will allow users to quickly and easily control the device display in the same manner as they would a TV screen. The touch sensor is already in production and should be available for purchase in mid 2017. The touchscreen technology has made its way into the consumer electronics, desktop computers and notebook computers. The ultrabook could be defined as small, light designed laptops that are designed to run on cheaper power. For instance, the Sony Vaio VGN-CS320J is a 13.3-inch laptop computer that is designed with an Intel Core i5 processor with 8GB of RAM, 256GB of SSD storage and an Intel HD 520 graphics processing unit (GPU). The ultrabook also features 32GB of eMMC flash memory for booting files. The touchscreen module is part of the AV Controls in this product line. With this touch module, users can find the AV Controls on the device's bottom side. This module allows users to easily configure the visuals on the device. Users can also touch or tap parts of the screen for several active control tasks. For instance, touch or tap the screen to change between displays, access menu items and more. A video camera is also built into this model for use as a webcam to allow videoconferencing over Skype, Google Hangouts and other services.

The processor is an Intel Core i5-6200U Processor Chip with 8GB of memory size, 256GB hard drive speed storage and an Intel HD Graphics 520 graphic processing unit (GPU). The touchscreen module is also available for use with the Intel Core i5-6200U Processor Chip with 8GB of memory size, 256GB hard drive speed storage and an Intel HD Graphics 520 graphic processing unit (GPU). The computer's screen size is 13.3 inches. The screen's screen resolution is 1366 x 768 pixels with HD Retina display, which can be used to view videos and photos by the 1080p HD standard video resolution. The RAM in this model is 8GB in size, which can be upgraded up to 32GB. The hard drive space in this ultrabook model provides space for 466 operating system files and applications. The operating system is a Windows 10 Home operating system, which comes pre-installed with this model. It also includes Microsoft Word, the Asus WebStorage Cloud Service and the Microsoft Office 365 Cloud Service. The computer has a webcam feature with a 720p HD camera for taking photos and making videos using Skype or Google Hangouts software. It also includes a microphone for speaking into while using these services or recording sound to use in YouTube videos. The model also features a large full size island-style keyboard. The pointing device is a touch pad with integrated left and right click buttons. The mouse can be used to select items or scroll through pages of data on the screen.
